Registry services

Our Internet Solutions

Registry services

The e-service system is a useful service to the customer wherever in the world. It assists the customer to report his lost or stolen documents and to take the appropriate and suitable action. It keeps track of the complaints given to different authorities like the police or the registry companies who issue documents.

Registry for a North American Internet services company featuring multi-lingual interface and adherence to international audit requirements.

Security Protocols

- ❑ Certificate Management, Data Encryption/Decryption
- ❑ Authentication, Configuring Remote sites
- ❑ Configuring Connections, Context - Sensitive Help

SunScreen (SKIP-E+) is a single user software, which can be used to secure the transactions of the user through the public and local area networks. This software uses the SKIP specification. It is one way of protecting network traffic through management of keys and encryption.

Multi-tier Applications

- ❑ Three-tier architecture used
- ❑ File upload from client to business server with HTTP protocol
- ❑ DB access via ADO and ODBC
- ❑ Server side scripting with ASP on IIS and 'C'
- ❑ Business processing through Active Server Components
