

Vision

Fusion would emerge as a highly successful global software organization, which would stand apart for its delivery of high quality products and services in advanced technological areas

Quality policy

Fusion is committed to create, review and upgrade its quality system, which enables the delivery of total quality solutions to its clients

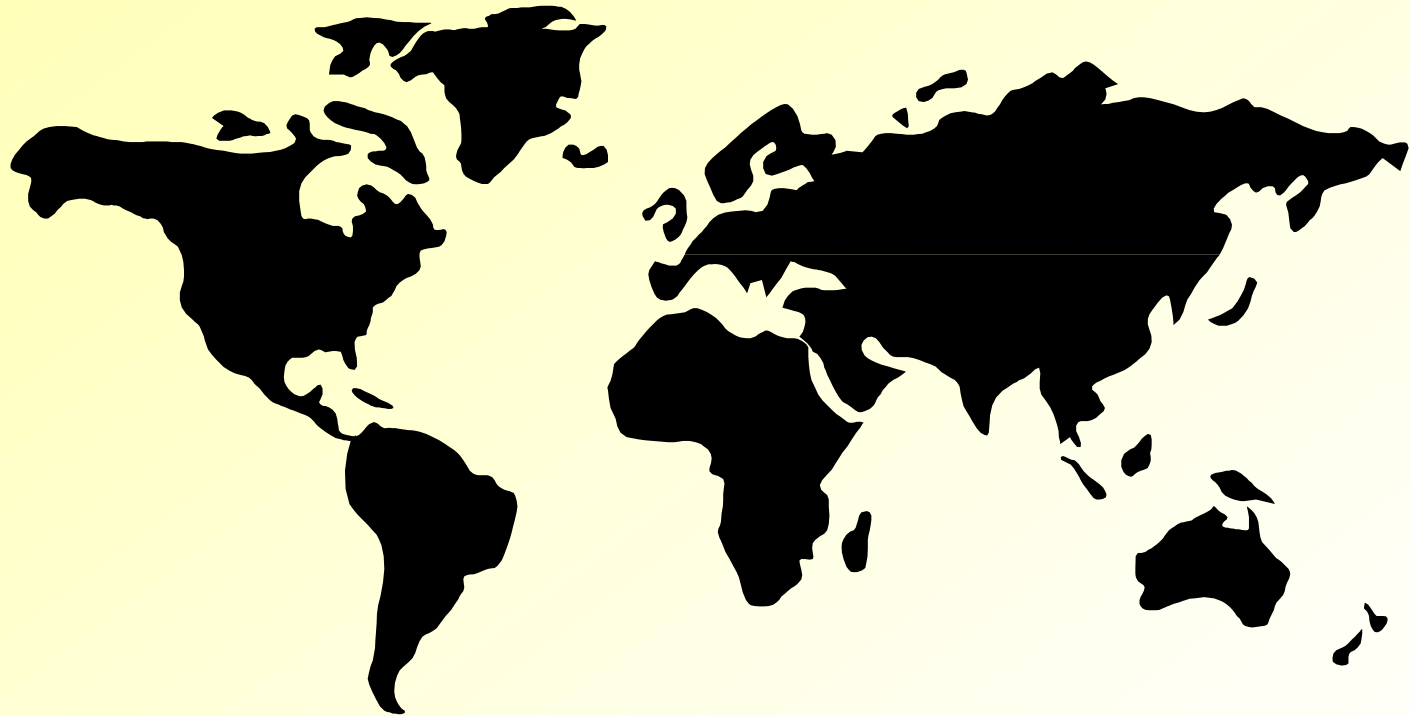

Mission

- ❑ Create a total quality organization that builds and shapes people and processes to strengthen its core competencies and to ensure timely deliveries
- ❑ Establish an efficient network of marketing bases and associates to increase global reach and obtain long-term clients in the areas of focus

Quality objectives

- ❑ Clients' needs and goals will be given the highest priority
- ❑ Fusion will endeavor to ship "zero defect" products/services to its clients
- ❑ The process of development would be an inseparable part of all deliveries
- ❑ Continuous learning and improvement in the areas of process and people
